

**BUILDING UP A
SUSTAINABLE
FUTURE**

MAXIMIZING YOUR CLEAN ENERGY INVESTMENTS

We manage your renewable energy portfolio. We are specialized in photovoltaic and wind power. Clean energy for a sustainable future.

COMPETENCE

We accumulate a background of more than 35 years in the development of renewable energy projects.

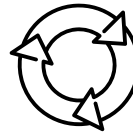

INNOVATION

We move across different areas of knowledge in search for new solutions and applications.

TRUST

We are convinced that maintaining a trustful relationship with our client is synonymous with success.

VALUE

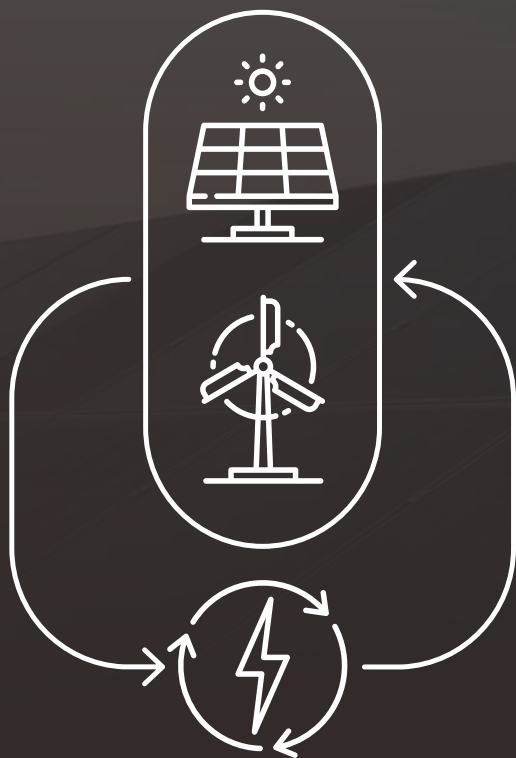

We focus our work on solid projects that generates sustainable values for our clients.

THE TEAM YOU TRUST

TARTESSOS OUTSTANDINN is a new, leaner, more flexible and client focused collaboration of companies, built upon decades of project management and engineering competence, where the traditional and field-tested skills in the industry are now merged with **INNOVATIVE** and creative approaches.

We are **CHALLENGE DRIVEN**. Our culture is embedded with curiosity and relentless hard work. The goal is to make industrial project management and product development simply better.

SERVICES

We offer a full range of services from greenfield development to ready-to-build, from construction and commissioning to operation and maintenance.

We aim for outstanding results and differentiated **VALUE** to all our clients.

TECHNICAL ADVISORY

We are involved in the very early stage of projects, assessing project potential and feasibility

- ▶ Yield calculation
- ▶ Due diligence
- ▶ Technical audits
- ▶ Feasibility study
- ▶ Tender Documents
- ▶ Status reports of mid & high voltage grid power lines and substations

PROJECT DEVELOPMENT

We identify and qualify the best project location and coordinate all permitting activities with specialist experts

- ▶ Negotiating surface right contract options
- ▶ Applications for grid access and grid connection point
- ▶ Filing and follow-up of EIA applications
- ▶ Coordination of industrial and urbanistic permits and construction license

ENGINEERING

Multi-disciplinary approach to projects on behalf of developers, owners, lenders and contractors

- ▶ Conceptual Design
- ▶ Basic Engineering
- ▶ Detailed Engineering
- ▶ FEED Engineering
- ▶ 2D and 3D CAD
- ▶ Engineering for RFP bids

PROJECT MANAGEMENT

We offer the full range of services on a EPCM basis

- ▶ Resource Planning
- ▶ Project Scheduling
- ▶ Task Scheduling
- ▶ Procurement
- ▶ Expediting and Inspection
- ▶ Document Control
- ▶ Interface Management
- ▶ Claim Management

CONSTRUCTION

We support contractors, owners and lenders on-site during the project execution from site opening and mobilization up to hand over

- ▶ Pre-Installation verifications
- ▶ Construction Management and Supervision
- ▶ Commissioning and testing supervision
- ▶ QA/QC Inspections
- ▶ As-built documentation

ASSET MANAGEMENT

We identify and qualify best project location and available grid connection points. We will coordinate all permitting activities with specialized experts

- ▶ Accounting, contract- and commercial management
- ▶ Invoicing of injected electricity and claim management
- ▶ Production monitoring and supervising O&M staff
- ▶ Management of cost control, procedures and quality control

ACCOMPLISHMENTS

All partners in TARTESSOS OUTSTANDINN have a proven track-record of 15-20 years in the sectors working in leading positions in international projects set-ups. We have participated in dozens of projects and has accumulated extensive experience in the power sector. There are many success stories among which we highlight the following.

OURIKA! SOLAR PLANT

A 46 MW photovoltaic plant installed in Ourique, south of Portugal. First utility scale PV plant to operate without feed-in tariff. **SCOPE:** Site & Engineering Supervision

SOMINCOR

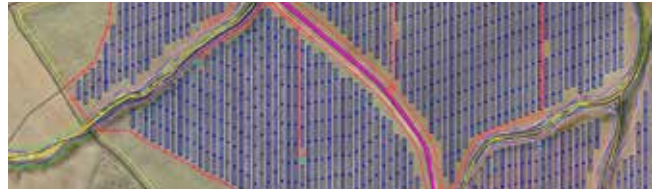

Conversion of hydro-cyclones arrangement in zinc wash plant of Neves Corvo mines, Portugal, for increased operation efficiency. **SCOPE:** Engineering and Design

VINYARD

Feasibility study of a PV installation for support of a irrigation system of two vineyards in Beja, Portugal, under an off-grid model. **SCOPE:** Feasibility Study

SEVILLA 1&2&3

Greenfield project development for three PV projects in the province of Seville with a total capacity of approx. 90 MW. **SCOPE:** Proj. Development (land securement & permitting)

WIND FARMS IN PORTUGAL

Our team has experience in wind farms, having participated in the installation and supervision of over 170 MW in Portugal, spread over five different wind farm locations. First greenfield wind project are recently under evaluation. **SCOPE:** Design, Engineering and Construction Supervision

FUEL-CELL TECHNOLOGY

Engineering modeling of a Fuel-Cell Technology that applies to all continuous-combustion processes, making the combustion process more fuel-efficient, with lower Carbon footprint and less environmental impact. **SCOPE:** Engineering and Design

OUR CLIENTS AND PROJECTS

VENEZUELA

BRAZIL

**PORTUGAL
& SPAIN**

**FRANCE &
NETHERLANDS**
